## PRAISE FOR **CYBER WAR**

“Chilling. . . [A] harrowing—and persuasive—picture of the cyberthreat the United States faces today.” —Michiko Kakutani, *New York Times*

“Clarke and Knake are right to sound the alarm.”

—Glenn Harlan Reynolds, *Wall Street Journal*

“[*Cyber War*] may be the most important book about national-security policy in the last several years.” —Fred Kaplan, *Slate.com*

“*Cyber War* will strengthen Clarke’s claims as one of the founding fathers of cyber-securocracy. He argues that due to an exceptional dependency on networked computer systems that are largely unregulated, it is just a matter of time before the US and its allies face cybergeddon. It is worth buying this book if only for his pithy five-page vision of this coming apocalypse and a return to stone-age conditions within a week, all because of a few pesky hackers and viruses.” —Misha Glenny, *Financial Times*

“[U]rgent policy prescriptions [wrapped] in easy-to-digest, occasionally riveting, tales from the cyber-front. . . . [A] cyber-9/11 could be the next big thing, [Clarke] cautions, conjuring visions of frozen Pentagon computers, blinded telecom satellites, dead power plants, subways grinding to a halt, exploding petrochemical installations. . . .”

—Jeff Stein, *Washington Post*

“[A] good introduction to this esoteric but very serious national security problem, and citizens should read it. . . . There is much to agree with in Clarke’s analysis, including his description of the absorption of cyber weapons into all aspects of military planning, his account of the secret cyber-arms race among nations, and his assessment of America’s cyber-security weaknesses, especially in its privately owned critical infrastructure sectors.”

—Jack Goldsmith, *The New Republic*

“[C]ompelling. . . [Clarke and Knake] argue with great force that our electric grid and banking system are vulnerable to a cyber attack coming from Tehran or Beijing or North Korea.”

—James D. Zirin, *HuffingtonPost.com*

SIX	How Offensive?	179
SEVEN	Cyber Peace	219
EIGHT	The Agenda	257
	<i>Glossary</i>	<i>281</i>
	<i>Appendix: The Nuclear Worm</i>	<i>291</i>
	<i>Index</i>	<i>297</i>

## "Cyber War may be the new policy in the last

**R**ichard A. Clarke and Robert K. Knake explain how a cyber attack could wreak havoc on our economy, our way of life, and our national security. In the face of a threat, silent cyber attacks are the new norm. The federal government, and the rest of us, are not prepared. It

explains clearly and compellingly what cyber wars are, how cyber weapons work, and how vulnerable we are as a nation and as individuals to the vast and looming web of cyber criminals. This is the first book about the war of the future—cyber war—and a convincing argument that we may already be in peril of losing it.
