lack skills, wealth, or convenient

Defining, designing, creating, and
able role... In EVERY group, con

Unless you are talking a one-time
and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex
enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say,
'What are we really trying to accomplish here? And is there a different way to look at it?'

This Self-Assessment empowers people to do just that - whether their title is entrepreneur, manager, consultant, (Vice-)
President, CxO etc... - they are the people who rule the future. They are the person who asks the right questions to
make Cyber Security investments work better.

This Cyber Security All-Inclusive Self-Assessment enables You to be that person.

All the tools you need to an in-depth Cyber Security Self-Assessment. Featuring 717 new and updated case-based
questions, organized into seven core areas of process design, this Self-Assessment will help you identify areas in
which Cyber Security improvements can be made.

In using the questions you will be better able to:

- diagnose Cyber Security projects, initiatives, organizations, businesses and processes using accepted diagnostic
standards and practices
- implement evidence-based best practice strategies aligned with overall goals
- integrate recent advances in Cyber Security and process design strategies into practice according to best practice
guidelines

Using a Self-Assessment tool known as the Cyber Security Scorecard, you will develop a clear picture of which Cyber
Security areas need attention.

Your purchase includes access details to the Cyber Security self-assessment dashboard download which gives you
your dynamically prioritized projects-ready tool and shows your organization exactly what to do next. Your exclusive
instant access details can be found in your book.
